**DETAILED ACTION**

***Election/Restrictions***

The restriction requirement of record is maintained. Applicant's election with traverse of Group I, claims 29-60 and 70-73 in Paper No. 14 is acknowledged. The traversal is on the ground(s) that the two groups for restriction set forth by the examiner all stem from a common concept and theory and are thus related. This is not found persuasive because it is not clear what common concept and theory applicant is referring to. Further, applicant is reminded of the extensive literature search involved which is quite extensive while not being co-extensive. The reasons for restriction were clearly made in the previous office action and thus, the requirement is properly made. Applicant's election of the species listed in paper number 14 is also noted. Some of the elections such as the election for claims 33-35, 45 and 47 are not clear. In claims 33-35 applicant is required to pick one of either, human proteins, human blood proteins or human plasma proteins. In claims 45 and 47 applicant is required to pick from the markush group.

Upon further review of the application, applicant is further required to elect from the following species election.

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Applicant is required to pick one of the following species:

- \* 1) The tissue adhesive with fibrinogen, elastase inhibitor and plasminogen.
- 2) The tissue adhesive with fibrinogen, elastase inhibitor and plasmin inhibitor or plasmin activator inhibitor.
- 3) The tissue adhesive with fibrinogen, elastase inhibitor and an antibiotic.
- 4) The tissue adhesive with fibrinogen, elastase inhibitor and Factor XIII.
- 5) The tissue adhesive with fibrinogen, elastase inhibitor and a solid surface.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The following claim(s) are generic: claims 29, 70 and 72.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: the different species do not share a special technical feature since they differ both in structure and function from one another.
